

## ProtoCom-KT Product Notice

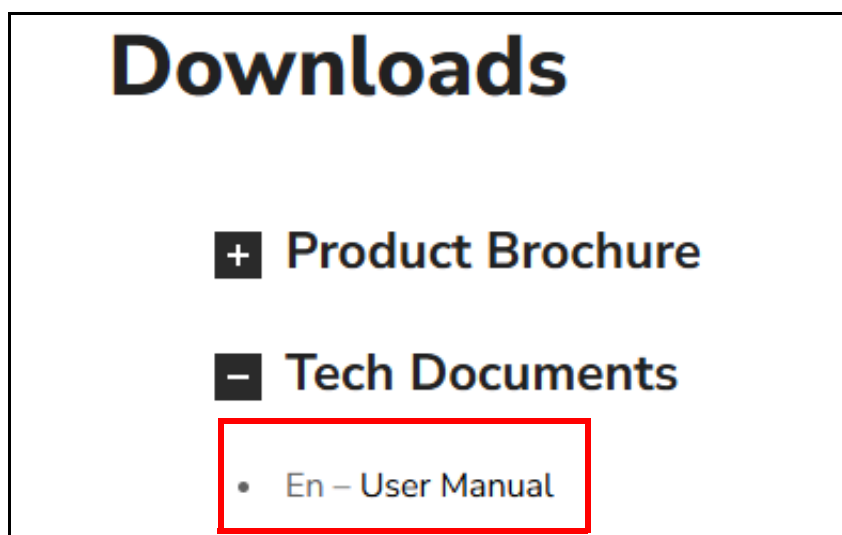

**IMPORTANT! Read this notice BEFORE opening the smaller ProtoCom box!**

The box containing your ProtoCom-KT order contains this product notice, the unit itself in a separate box, a communication cable, and a power supply.

While ProtoCom's setup is simple, there are a number of steps you need to follow correctly to configure your particular setup, such as configuring the device on the network. Instructions for doing this and connecting to the web application for additional settings are located in the *ProtoCom Protocol Gateway User Manual V.1.05*. It is important that you download and review the user manual before using the ProtoCom device.

You can access the manual from EIG's website:

1. Access the ProtoCom webpage:  
<https://www.electroind.com/products/protocom-protocol-gateway/>
2. Click Downloads tab on the webpage. Then click Tech Documents> User Manual to download the manual.
