Introduction

Electro Industries’ Shark® 100 meter is one of the industry’s highest performance revenue grade panel meters. With a sampling rate of over 400 samples per cycle, the meter excels in accuracy, with readings rated at ANSI C12.20 0.2 CL and IEC 62053-22 0.2S classes. The meter has an easy-to-read, bright red LED display, with intuitive navigation. The Shark® 100 meter is ruggedly designed using intrinsically safe current inputs. It is ideal for both new metering applications and as an easy replacement for existing, installed meters.

Virtual Upgrade Switches

The Shark® 100 meter is equipped with EIG’s exclusive V-Switch™ technology. This allows you to upgrade and add features, even after the meter is installed.

**Note:** You must purchase a Com port option to upgrade V-Switch™ keys (see the Ordering guide on the last page).

Available V-Switch™ Keys:

- V1 – Voltage and Current Meter (Default).
- V2 – V, A, kW, kVAR, PF, kVA, Freq.
- V3 – V, A, kW, kVAR, PF, kVA, Freq, kWh, kVAh, kVARh, and DNP3.
- V4 – V, A, kW, kVAR, PF, kVA, Freq, kWh, kVAh, kVARh, THD Monitoring, Limit Exceeded Alarms, and DNP3.

Rugged and Safe Voltage and Current Inputs

The Shark® 100 meter is designed for harsh electrical applications in both high voltage and low voltage power systems. This feature is especially important in power generation, utility substation, and critical user applications.

**High Isolation Universal Voltage Inputs**

- Voltage inputs allow measurement of up to 416 volts line to neutral and 721 volts line to line.
- One unit will perform to specification on 69 volt, 120 volt, 230 volt, 277 volt, and 347 volt power systems.

**Short Circuit Safe Current Inputs** - Current inputs use a unique dual input method:

- **Method One** – CT Lead Pass Through: The CT lead passes directly through the meter without any physical termination on the meter. This ensures that the meter cannot be a point of failure on the CT circuit. This method is preferable to utility users when sharing relay class CTs. No burden is added to the secondary CT circuit.
- **Method Two** – Current “Gills”: The meter also provides ultra-rugged termination pass-through bars that allow the CT leads to be terminated on the meter. The Shark® meter’s stud-based design ensures that your CTs will not open in a fault condition.

Communication and Pulse Output

- Optional RS485 port offers Modbus communication and baud rates from 9,600 to 57,600 (485P Option).
- Optional 10/100BaseT Modbus TCP Ethernet Port (INP10 Option).
- Optional communication includes a fixed energy pulse mapped to positive energy.

Easy to Install and Use

- Simple faceplate programming.
- Set up through PC.
- Phasor diagram showing wiring status.
- Auto scroll of meter readings (programmable).
- Analog style % of load bar.
- Shallow panel depth.
- Color coordinated voltage and current inputs.

**Rugged and Safe Voltage and Current Inputs**

The Shark® 100 meter is designed for harsh electrical applications in both high voltage and low voltage power systems. This feature is especially important in power generation, utility substation, and critical user applications. This meter’s structural and electrical design was developed based on the recommendations and approval of many of our utility customers.

**High Isolation Universal Voltage Inputs**

- Voltage inputs allow measurement of up to 416 volts line to neutral and 721 volts line to line.
- One unit will perform to specification on 69 volt, 120 volt, 230 volt, 277 volt, and 347 volt power systems.

**Shark® 100 Meter ANSI and DIN Mounting**

The unit mounts directly in an ANSI C39.41 (4" round form) or an IEC 96 mm DIN square form. This is perfect both for new installations and for existing panels. In new installations, simply use DIN or ANSI punches. For existing panels, pull out old analog meters and replace them with the Shark® 100 meter. The meter uses standard voltage and current inputs so that CT and PT wiring does not need to be replaced.

- Perfect for switchgear panel direct retrofit.
- Uses minimal panel space.
- Mounts in only 4" panel depth.

See the Shark® 100 Meter User Manual for additional wiring diagrams.
