**Features**

- 0.5% Class Accuracy - Built-in Test Pulse to Verify Accuracy
- Meets Both Revenue Metering Accuracy and Environmental Standards
- Optional RS485 with Modbus Protocol
- Large, Bright Red, Easy-to-Read LED Display
- % of Load Bar for Analog Meter Perception
- Fits Both ANSI and DIN Cutouts
- Great for Retrofit and New Applications
- Uses Minimal Panel Space and Depth

**Applications**

- Commercial Metering
- Industrial Metering
- Power Generation
- Campus Metering
- Submetering
- Indication Meter Replacement

**Introduction**

Electro Industries’ Shark® 50 meter is a high-quality, affordable 0.5% class electrical switchboard panel meter. Designed for easy installation into electrical panels and switchgear, it is ideal for both new metering applications and as a simple replacement for existing analog or older electrical meters. Its bright red, three-line, built-in LED display makes meter readings easily viewable. In addition, the display has an anti-dither algorithm to improve reading stability. Its high-speed DSP technology and high-resolution A/D conversion provide stable and reliable measurements. And you can easily verify its energy accuracy using the meter’s built-in test pulse.

**The Economical Meter for the OEM**
Superior Accuracy

Notes: 1For 2.5 element programmed units, degrade accuracy by an additional 0.5% of reading. 2For unbalanced voltage inputs where at least one crosses the 150 V auto-scale threshold, degrade accuracy by additional 0.4%.

Virtual Upgrade Switches

The Shark® 50 meter is equipped with ElG’s exclusive V-Switch™ technology. This allows you to upgrade and add features, even after the meter is installed.

Note: You must purchase the Com port option to upgrade V-Switch™ keys (see the ordering guide on the last page).

Available V-Switch™ Keys:

- V1 – Voltage and Current Meter (Default)
- V2 – V, A, kW, kVAR, PF, kVA, Freq
- V3 – V, A, kW, kVAR, PF, kVA, Freq, kWh, kVAh, kVARh

Rugged and Safe Voltage and Current Inputs

The Shark® 50 meter is designed for harsh electrical applications in both high voltage and low voltage power systems. This feature is especially important in power generation, utility substation, and critical user applications. This meter’s structural and electrical design was developed based on the recommendations and approval of many of our utility customers.

High Isolation Universal Voltage Inputs

- Voltage inputs allow measurement of up to 416 volts line to neutral and 721 volts line to line.
- One unit will perform to specification on 69 volt, 120 volt, 230 volt, 277 volt, and 347 volt power systems.

Short Circuit Safe Current Inputs - Current inputs use a unique dual input method:

- **Method One** – CT Lead Pass Through: The CT lead passes directly through the meter without any physical termination on the meter. This ensures that the meter cannot be a point of failure on the CT circuit. This method is preferable to utility users when sharing relay class CTs. No burden is added to the secondary CT circuit.
- **Method Two** – Current “Gills”: The meter also provides ultra-rugged termination pass-through bars that allow the CT leads to be terminated on the meter. The Shark® meter’s stud-based design ensures that your CTs will not open in a fault condition.

Communication and Pulse Output

- Optional RS485 port offers Modbus communication and baud rates from 9,600 to 57,600. (485P Option)
- RS485 option includes a fixed energy pulse mapped to positive energy.

Easy to Install and Use

- Simple faceplate programming
- Set up through PC
- Phasor diagram showing wiring status
- Auto scroll of meter readings (programmable)
- Analog style % of load bar
- Shallow panel depth
- Color coordinated voltage and current inputs

Virtual Upgrade Switches

Available V-Switch™ Keys:

- V1 – Voltage and Current Meter (Default)
- V2 – V, A, kW, kVAR, PF, kVA, Freq
- V3 – V, A, kW, kVAR, PF, kVA, Freq, kWh, kVAh, kVARh
**Shark® 50 Meter ANSI and DIN Mounting**

The unit mounts directly in an ANSI C39.41 (4" round form) or an IEC 96 mm DIN square form. This is perfect both for new installations and for existing panels. In new installations, simply use DIN or ANSI punches. For existing panels, pull out old analog meters and replace them with the Shark® 50 meter. The meter uses standard voltage and current inputs so that CT and PT wiring does not need to be replaced.

- Perfect for switchgear panel direct retrofit.
- Uses minimal panel space.
- Mounts in only 4" panel depth.
### Specifications

**Voltage Inputs:**
- (20-416) Volts Line to Neutral, (20-721) Volts Line to Line
- Universal Voltage Input
- Input Withstand Capability – Meets IEEE C37.90.1 (Surge Withstand Capability)
- Programmable Voltage Range to Any PT Ratio
- Supports: 3 Element WYE, 2.5 Element WYE, 2 Element Delta, 4 Wire Delta Systems
- Burden: 0.014 VA/Phase at 120 Volts
- Input Wire Gauge Max (AWG 12 / 2.5 mm²)

**Current Inputs:**
- Class 10: (0.005 to 10) A, 5 A CT Nominal Secondary, 10 A Maximum
- Fault Current Withstand (For 23 °C, 3 Phase Balanced WYE or Delta load): 100 A for 10 Seconds, 300 A for 3 Seconds, 500 A for 1 Second
- Programmable Current to Any CT Ratio
- Burden 0.005 VA Per Phase Max at 11 A
- 0.1% of Nominal
- Pass Through Wire Gauge Dimension: 0.177" / 4.5 mm²
- Continuous Current Withstand: 20 A for Screw Terminated or Pass Through Current Connections

**Isolation:**
- All Inputs and Outputs are Galvanically Isolated to 2500 Volts AC

**Environmental Rating:**
- Storage: (-20 to +70) °C
- Operating: (-20 to +70) °C
- Humidity: to 95% RH Non-Condensing
- Faceplate Rating: NEMA 12 (Water Resistant) Gasket Included
- Protection: IP30 - Meter Front/Back

**Sensing Method:**
- RMS
- Sampling at 400+ Samples per Cycle on All Channels Measured Readings Simultaneously

**Update Rate:**
- All Parameters Up to 1 Second

**Power Supply:**
- (90 to 265) Volts AC

**Communication Format (optional):**
- RS485 Port (Through Back Plate)
- Com Port Baud Rate: (9,600 to 57,600)
- Com Port Address: 0-247
- 8 Bit, No Parity
- Modbus RTU, ASCII

**KYZ Pulse:**
- Type Form A
- On Resistance: (23-35) Ohm
- Peak Voltage: 350 V DC
- Continuous Load Current: 120 mA
- Peak Load Current: 350 mA (10ms)
- Off State Leakage Current @ 350 V DC: 1 mA

**Dimensions and Shipping:**
- Weight: 2 lbs
- Basic Unit: (H4.85 x W4.85 x L4.25) in.
